# Definition of a “Project”

The definition of a **project** within Prince2™:

A temporary organization founded with the aim to create one or multiple company products according to an agreed upon Business Case.

# Project parties, Structure and Responsibilities

Three project parties:

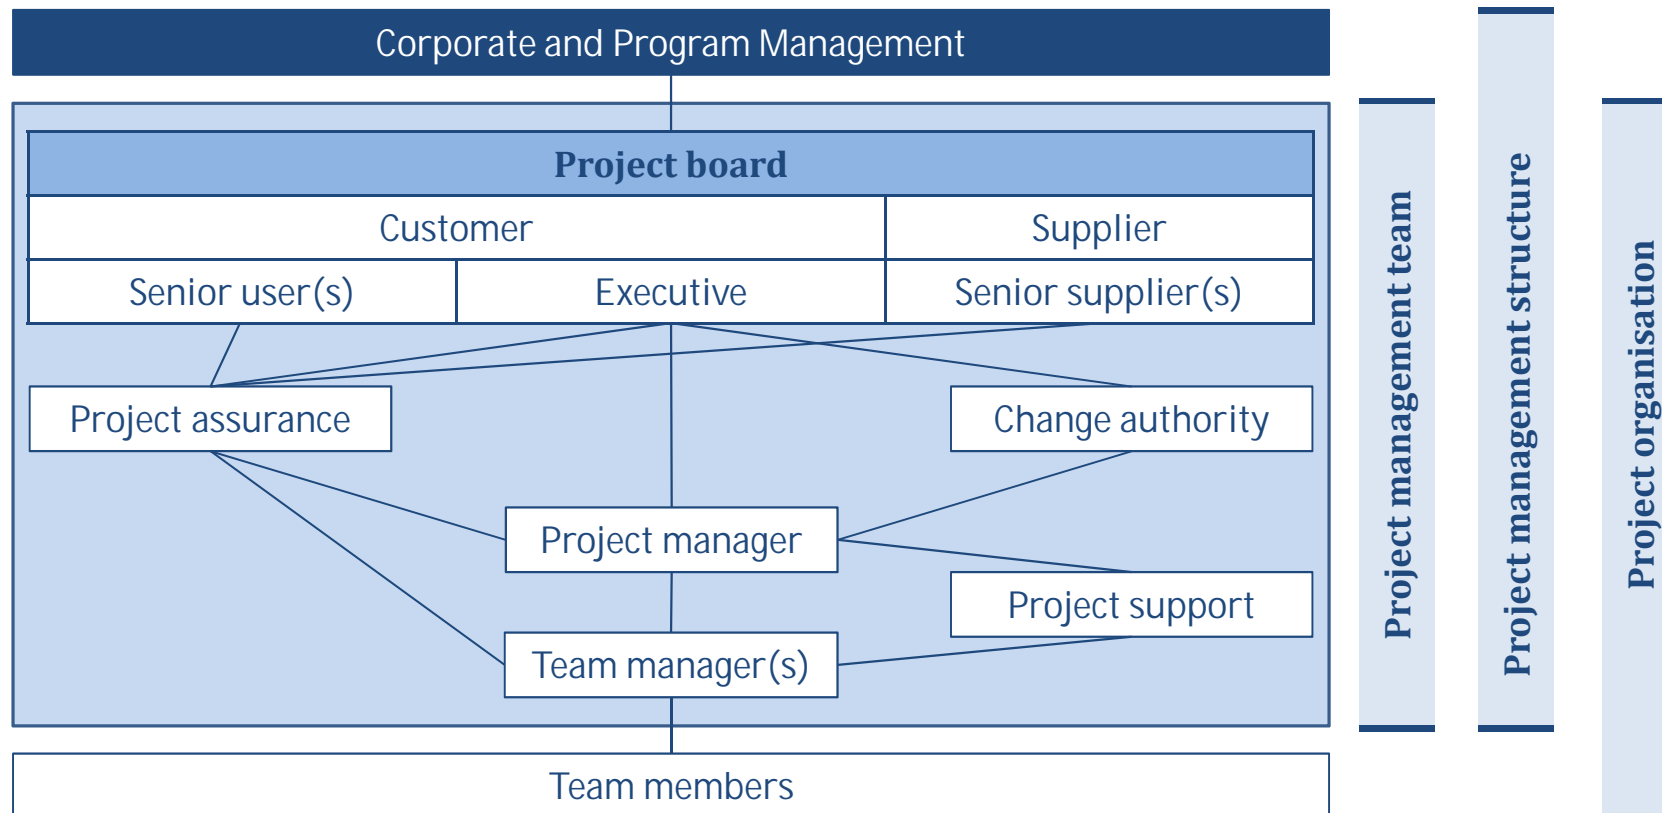

Project management structure:

# Project parties, Structure and Responsibilities

The project management team:

# Management processes

Processes within project management:

	Pre-project	Initiation stage	Subsequent delivery stage(s)	Final delivery stage
Directing	Directing a Project			
Managing	SU	IP SB	Controlling a Stage SB	Controlling a Stage CP
Delivering			Managing Product Delivery	Managing Product Delivery

SU = Starting Up a Project  
 IP = Initiating a Project  
 SB = Managing Stage Boundaries  
 CP = Closing a Project

# Management products

Baseline: Describe the project and can only be altered with approval and via the formal modification procedures  
 Records: Dynamic management products that contain information on the progress of the project  
 Reports: Within these the current statuses of the various aspects of the project are being tracked
